

eCopy™ ShareScan® OP

Overview

eCopy ShareScan OP connects your copier to your organisation's e-mail and other networked enterprise applications for low-cost, easy to use, instantaneous distribution and management of paper-based information.

This award-winning software sets the standard for simple, secure, and cost effective electronic distribution and integration of paper-based information into your unique business processes.

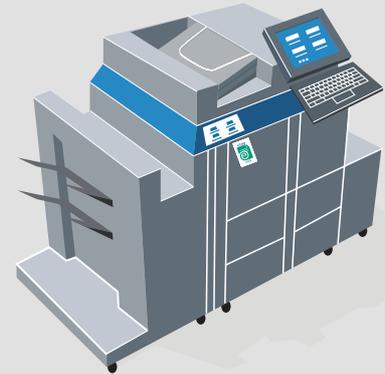

A familiar and intuitive user interface assists the user in quickly sending scanned documents to their destination

Easily capture paper-based information at a nearby networked copier with eCopy

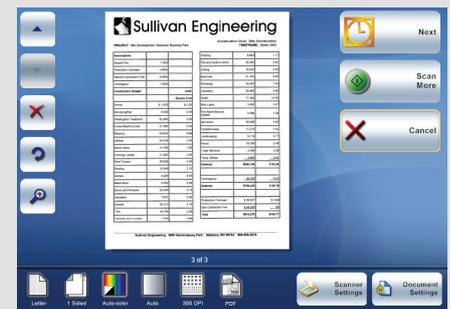

- Advanced scanning options are standard with the product enabling users to:
 - Choose file format on the fly (PDF, JPG, TIFF)
 - Preview document before sending
 - Change image properties (size, resolution, colour, etc.)
- Connect to your existing e-mail, fax, cost recovery, and other enterprise applications to reduce the cost and time of distributing paper via traditional methods (fax, courier, postal services)
- Manage multiple eCopy-enabled copiers from a central location minimising the need for IT administration time
- Ensure document security by e-mailing with built-in encryption
- Build custom connections to any enterprise application using eCopy Quick Connect or the eCopy Software Developers Kit (SDK)
- Protect your company's confidential information by creating an audit trail with user authentication

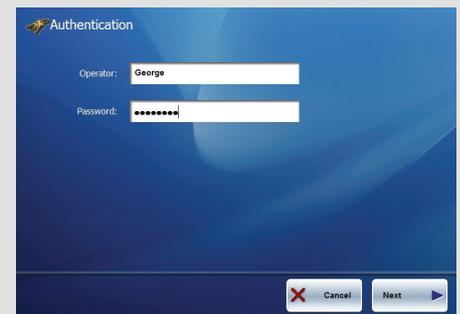

Workflow

Place paper documents in the digital copier's paper tray, and push the eCopy button. The document runs through the digital copier at high-speed.

Preview document at the eCopy-enabled device to ensure image quality

User authenticates at the eCopy-enabled device ensuring that scanned documents are always attributed to a specific user

Then, the user selects recipients from the online address book and creates a PDF file for simple distribution and management.

eCopy ShareScan OP is easy to use and available on most copier platforms. eCopy ShareScan OP can be purchased to run as an external piece of hardware that attaches to your copier, the eCopy ScanStation, or inside your copier, eCopy embedded. eCopy ShareScan OP also ships with licenses of eCopy Desktop to view and edit your scanned paper documents.

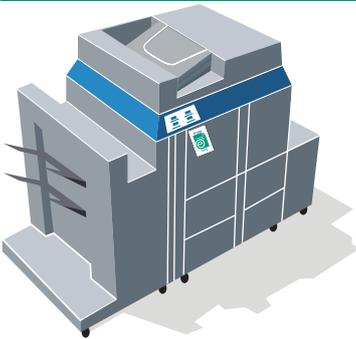

eCopy ScanStation (External Version)

The eCopy ScanStation includes an integrated, free standing touch screen, keyboard, and CPU that connects easily to any scan-capable digital copier or document scanner.

- Supports both color and black & white scanning
- Destination options are shown as easy to read icons on the eCopy ScanStation touch screen and may include: Scan and Mail, Scan and Fax, Scan to Desktop, Scan to Printer, and Scan to document management system or any other enterprise application.
- Previews document prior to sending

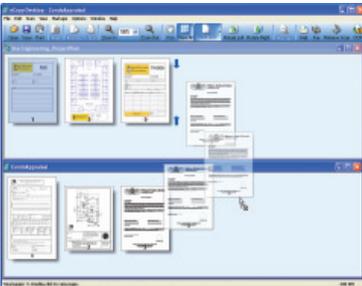

eCopy ShareScan OP Embedded (Embedded Version)

eCopy Embedded runs on copiers that offer an application program, enabling eCopy ShareScan OP to be accessed from the copier's touch screen.

- Runs inside the eCopy-enabled device
 - » Eliminates need for additional touch screen hardware
- Supports both colour and black & white scanning
- Easily preview scanned documents with "zoom in" capabilities

eCopy Desktop (included with eCopy ShareScan OP)

eCopy Desktop provides an intuitive, user-friendly interface that enables users to retrieve and edit original-quality scanned images of paper documents just like electronic files, integrating them into existing corporate workflow procedures right at their PC.

With eCopy Desktop, users can view and edit any PDF, create PDFs in seconds, combine documents from different sources, perform markups or annotations, sign documents electronically, and integrate scanned documents with their e-mail, network fax, and document management systems.
